Assignment 7 *Comprehensive Design:*

Based on the work you did with Style Tiles, create a comprehensive design in Photoshop. Comprehensive Designs are polished snapshots of what your site will look like for client approval. All typography, composition, and color application should be figured out. It should look like a finished web page without having to build the HTML/CSS/JS.

Use Photoshop (or a digital imaging tool of your choosing) and save your solutions as flattened JPG's or PDF (refrain from compressing).

Polished design comp

Polished snapshot of what each page of the final project website will look like.
Submit this in a jpg or pdf format.

40pts

All content

Your document(s) showcases the entirety of the webpage(s). From the top of the header down to bottom of the footer and whatever design (if any) you plan to have on the sides of your page(s) as well.

40pts

Design

Spend some time making your site look good. Take note and gain some inspiration from existing beautiful sites.
