## Assignment 6 LightBox

Create a photography portfolio type website. Showcase at least 6 images all of which must have the lightbox function when they are clicked on. Do not forget to create some kind of hover state to your images to let the user know that the images can be interacted with.

HTML & CSS	Build two HTML pages with CSS to house your Lightbox.	20pts
6 images	A minimum of 6 images.	20pts
Lightbox	A functional lightbox which is activated the specific images are clicked on.	50pts
Original Images	The images you use must be original images. Build them to the needed pixel size in Photoshop and use the "Save For Web" feature to save it probably as a jpg.	10pts
Design	<i>Extra:</i> Spend some time making your site look good. Take note and gain some inspiration form existing beautiful sites.	+20pts

7% of final grade, **Total:** 100pts
